Gorman-Rupp Industries designs and manufactures pumps and pumping solutions for the Original Equipment Manufacturer (OEM). All series/models shown can be configured to meet specific OEM application requirements. Contact GRI for design points that fall outside of shown parameters.

Product Overview

Magnetic drive centrifugal pump operation is similar to a standard centrifugal pump except the motor shaft seal is eliminated. Magnetic drive pumps are designed to isolate the pump body from the motor by driving an impeller and magnet assembly with a drive magnet attached to the motor shaft. Motor torque is transmitted by a drive magnet through a plastic housing to the impeller assembly. The plastic housing separates the motor drive magnet from the fluid being pumped. Leaks caused by shaft seal failure are eliminated. The end result is a more efficient seal-less centrifugal pump that will not leak and is capable of achieving up to 50 thousand hours of continuous duty operation.

To handle the most aggressive chemicals, GRI's material of construction consists of special combinations of chemically inert plastic. The impeller shaft and bearing system handle the inherent friction and motor heat with built-in cooling passages that are designed to use the pumped liquid as a lubricating coolant. GRI uses ceramic shafts with either Teflon® or ceramic thrust bearings as standard materials for each magnetic drive pump line. These robust features add tremendously to the chemical compatibility and overall life of the pump to make it virtually maintenance free.

Impellers and pump bodies are designed to produce efficient flow and head characteristics required in today's applications. The hydraulic designs, coupled with motors specifically designed for the pump end, means less power consumption for the work performed.

Typical OEM applications include film processors, laser and x-ray cooling systems, medical, scientific, laboratory and silver recovery equipment. Magnetic drive centrifugal pumps must be used where flooded suction conditions exist.

Pump Specifications:

Flow Rates: Range to 35 gpm (132 lpm)

Max. Discharge Head: Range to 53 feet (16 m)

Max. Fluid Temperature: Up to 250°F (121°C)

Motors: All motors, except the 15651 series and 18650 series motors which use sleeve bearings, have sealed electric motor grade ball bearings, are thermally protected, class B insulated, and continuous duty rated. Most pumps available with AC or DC motors.

For proper selection of the wetted materials of construction (pump body, impeller, adapter disc, O-ring, impeller bearing) please visit GRI's website to view [Chemical Resistance Charts](#).

GRI specializes in the custom design and manufacturing of fluid pumps for the OEM market. Please contact us to discuss your project's needs and specifications.

180 Hines Ave. • Bellville, OH 44813 • PH: 419-886-3001 • FAX: 419-886-2338 • www.GRIpumps.com

Features:

- Corrosion resistant
- Limited dry run capability
- Hydraulically efficient
- Quiet operation
- No shaft seals
- Flexible mounting and body discharge positions
- Low current draw and heat rise
- NSF certified models available

OEM Options:

GRI specializes in the custom design and manufacturing of fluid pumps for the OEM market. Please contact us to discuss your project's needs and specifications.

Body

- NSF certified models available
- 3/8" MNPT

Thrust Bearings

- Reinforced Thermoplastic Resin
- Vectra®*

O-Rings (Elastomers)

- Fluorosilicone (14110 & 14518/20 Series only)
- Kel-F®
- Nitrile
- Neoprene
- Silicone
- Viton®/Fluoroelastomer

Motors

- 115V, 50/60 Hz
- 115V/230V, 50/60 Hz Capacitor start, drip-proof, ball bearing, thermally protected
- 115V, 50/60Hz; 230, 50/60 Hz Explosion-proof (14520 Series only)
- 115V, 50/60 Hz; 230V, 50/60 Hz Open, shaded pole
- 115V, 50/60Hz; 230V, 50/60 Hz Open, shaded pole, impedance protected, ball bearing
- 230V, 50/60 Hz
- Brush and brushless DC available
- Drip-proof, shaded pole, thermally protected
- TEFC/PSC, thermally protected

Magnetic Drive Pumps Series Comparison Chart

This chart is just a general overview of the magnetic drive pumps offered. GRI specializes in the custom design and manufacturing of fluid pumps for the OEM market.

There are many variables that must be considered when specifying a pump for your application. At first glance you may not find a pump that meets your requirements. GRI recommends that you contact our Technical Sales Staff to discuss your project so that the right pump can be specified. Many times we will customize an existing pump to meet your needs or design a new pump from the ground up.

	MAX FLOW	MAX HEAD	MAX SYSTEM PRESSURE	MAX FLUID TEMPERATURE	MOTOR SPECS / VOLTAGES
14110	11 GPM	16 FT	25 PSI	180°F (82°C)	•115, 230, 50/60 Hz
14520	26 GPM	35 FT	75 PSI	203°F (95°C)	•115, 230, 50/60 Hz
15651	3.75 GPM	13 FT	75 PSI	203°F (95°C)	•115, 230, 50/60 Hz
15700	35 GPM	53 FT	75 PSI	203°F (95°C)	•115, 230, 50/60 Hz
17650	10.5 GPM	57 FT	75 PSI	160°F (71°C)	•115, 230, 50/60 Hz •12, 24 DC Brushless
18650	12 GPM	23 FT	25 PSI	180°F (82°C)	•115, 230, 50/60 Hz
INTG1	2 GPM	11.5 FT	75 PSI	203°F (95°C)	•12, 24 DC Integrated Brushless
INTG3	7.93 GPM	45 FT	75 PSI	203°F (95°C)	•9-24 DC Integrated Brushless

14110 Series Magnetic Drive Pump • Ask us about available OEM options

Specifications	
Flow Rates	Max Range: 11 gpm
	Max Head: 16 ft
	Max Sys. Pressure: 25 psi
Fluid Temp. Max	180°F (82°C)
Materials in contact with solution / OEM options	
Body	Ryton®
Impeller	Ryton® with Epoxy adhesive
Adaptor	Ryton®
Pump Shaft	Ceramic
Impeller Bearings	Resin Impregnated Carbon
Front Thrust Bearings	Glass-Filled Teflon®
Rear Thrust Bearings	Ceramic
O-Rings (Elastomers)	• EPT/EPDM • Viton®/Fluoroelastomer • Nitrile • Neoprene • Silicone • Kel-F®
Motor specifications / OEM options	
Motor Specs	• 115V, 50/60 hz • 230V, 50/60 hz • Vented • Shaded pole • Thermally protected • Tefc/psa
Features	
Corrosion Resistant	Quiet operation
Hydraulically efficient	Flexible mounting and body discharge positions
No shaft seals	NSF certified models available
Low current draw and heat rise

18650 Series Magnetic Drive Pump • Ask us about available OEM options

18650 Series (115V) Models:

18650 Series (230V) Models:

Specifications

Max. Fluid Temp: 203°F (95°C)	Weight: 10 oz (283.5 grams)
Max Sys. Pressure: 75 psi	Connector: 1/2" MHB, 3/8" MPT
Max Flow: 2 GPM	Max Head: 11.5 feet
Dimensions: 2.57"W x 3.29"H x 3.42"L	

Motor specifications

Supply Voltage • Motor Speed Control

- 12v BLDC
- 24v BLDC w/ 0-5v third wire speed control (optional)

Inrush Current: None.

- Ramps up to running current.

Submersible option available

Materials in contact with solution

Body: PPS (Ryton®)	Housing: PPS (Ryton®)
Impeller: PPS (Ryton®)	Rotor Shell: PPS (Ryton®)
Impeller Shaft: Ceramic	Static O-Ring: EPDM, FKM
Bearing Plate: PPS (Ryton®)	

Features

Lightweight design	Impeller assembly only moving part
No motor bearings	Low power consumption
Quiet operation	Long life
Submersible option	Multiple OEM options
